BHOOMIKA S N

Bhoomika S N | Bhoomika S N | bhoomikasn08@gmail.com | +91 9481869812

Objective

Computer Science & Engineering student with solid background in programming, data structures and algorithms, web development, database and core computer science. Gained practical exposure through educational projects and internships in web technology and Artificial Intelligence, and has a keen interest in developing practical software solutions. A fast learner, problem solver and responsible team player who likes learning new technologies and wants to apply his skills to practical work.

Education

Nagarjuna college of Engineering and Technology 2022 - 2026
B.E- Computer Science and Engineering
(CGPA: 8.12/10)

Technical Skills

Languages: Java, C and Python(Basics)
Web Technologies: HTML, CSS, JavaScript
Database: MYSQL and MongoDB, Oracle Database
Version Management: Git, ServiceNow
Core Computer Science Concepts: Data Structures and Algorithms, Object-Oriented Programming,Computer Networks, Operating Systems, DBMS and Computational Theory
Analytics & Machine Learning: Machine Learning(Classification and Prioritization), Natural Language Processing(text analysis, recommendations), Statistical analysis, model evaluation, data validation

Projects

Intelligent Bug Prioritization and Fixing Based on ML

- Built an ML system to automatically classify and prioritize bug reports by severity, impact, and urgency using behavioral signals (clickstream, session drop-offs).
- Analyzed behavioral and operational data to identify high-impact defects.
- Automated severity and urgency classification to support faster issue resolution.
- Assessed model performance and accuracy to improve prioritization effectiveness.
- Supported decision-making by escalating business-critical issues impacting user experience.

Restaurant Management System

- Analyzed business requirements and translated them into functional application modules.
- Designed and developed a Python-based restaurant management system to manage orders, billing, and menu operations.
- Implemented data storage, validation, and an intuitive interface for efficient and accurate order processing.
- Performed unit testing to verify functionality and system reliability.

- Created technical and process documentation to support application usage and maintenance.

AI Resume Analyzer Using NLP

- Developed an AI-based Resume Analyzer that makes hiring easier and fairer by reducing biases and improving how candidates are evaluated using python and NLP.
- Enhanced an NLP-based analytical system to evaluate resumes and extract key candidate attributes.
- Applied text preprocessing, keyword extraction, and similarity scoring techniques.
- Generated personalized resume improvement recommendations using analytical insights.
- Evaluated model design, performance, and output quality to improve accuracy.
- Demonstrated strong analytical skills through qualitative and quantitative assessment of results.

INTERNSHIP

Web Development Intern — WAYEVA Innovations Mar 2025 – May 2025

- Supported application design and implementation of web-based solutions.
- Developed and tested frontend components using HTML, CSS, and JavaScript.
- Assisted in debugging, unit testing, and defect resolution activities.
- Maintained technical documentation and followed defined development processes.
- Used Git for version control and collaborative development.

AI Intern — Learner's Byte Bharat Unnati AI Fellowship Jan 2026 – May 2026

- Explored and worked with **Generative AI, Codexpert, Agentic AI, and automation tools** through hands-on learning and practical projects.
- Built small projects and workflows to understand how **AI agents and automation** can be used to solve real-world problems.
- Gained practical experience with **no-code, low-code, and coding-based tools** while developing and testing AI solutions.
- Improved my **problem-solving and technical skills** by working on projects involving AI, workflow automation, and system integration.

CERTIFICATIONS

Deloitte: Cyber Job Simulation and Data Analytics Job Simulation
ServiceNow: Micro-Certification: Welcome to SerivceNow (Xanadu), Certified System Administrator, Certified Application Developer
Oracle: Oracle Database Foundations
Workshop: 3 days Certified application developer workshop on Cyber Security
